

## Doravirine

Revised: February 15, 2024.

CASRN: 1338225-97-0

## Drug Levels and Effects

### Summary of Use during Lactation

No published information is available on the use of doravirine during breastfeeding. An alternate drug may be preferred. Achieving and maintaining viral suppression with antiretroviral therapy decreases breastfeeding transmission risk to less than 1%, but not zero. Individuals with HIV who are on antiretroviral therapy with a sustained undetectable viral load and who choose to breastfeed should be supported in this decision. If a viral load is not suppressed, banked pasteurized donor milk or formula is recommended.[1,2]

### Drug Levels

*Maternal Levels.* Relevant published information was not found as of the revision date.

**Disclaimer:** Information presented in this database is not meant as a substitute for professional judgment. You should consult your healthcare provider for breastfeeding advice related to your particular situation.
