

Crisaborole

Revised: February 15, 2024.

CASRN: 906673-24-3

Drug Levels and Effects

Summary of Use during Lactation

No information is available on the use of topical crisaborole during breastfeeding. Some experts recommend avoiding its use during lactation because of the lack of information.[1,2] In general, drugs applied to the mother's skin are unlikely to affect the breastfed infant unless it is applied to the nipple or other area where the infant can directly ingest it. Use of crisaborole in nursing mothers is not contraindicated by the product labeling,
