Ritlecitinib

Revised: November 15, 2023.

CASRN: 1792180-81-4

Drug Levels and Effects

Summary of Use during Lactation

No information is available on the clinical use of ritlecitinib during breastfeeding. Because of the risk of serious adverse effects, including malignancy, the manufacturer recommends that breastfeeding be discontinued during ritlecitinib therapy and for 14 hours after the last dose.
