

Neonatal Parenteral Nutrition

Supplementary material D - Health economic literature

NICE guideline NG154

Supplementary material D

February 2020

Final

Supplementary materials were developed by the National Guideline Alliance which is part of the Royal College of Obstetricians and Gynaecologists

Disclaimer

The recommendations in this guideline represent the view of NICE, arrived at after careful consideration of the evidence available. When exercising their judgement, professionals are expected to take this guideline fully into account, alongside the individual needs, preferences and values of their patients or service users. The recommendations in this guideline are not mandatory and the guideline does not override the responsibility of healthcare professionals to make decisions appropriate to the circumstances of the individual patient, in consultation with the patient and/or their carer or guardian.

Local commissioners and/or providers have a responsibility to enable the guideline to be applied when individual health professionals and their patients or service users wish to use it. They should do so in the context of local and national priorities for funding and developing services, and in light of their duties to have due regard to the need to eliminate unlawful discrimination, to advance equality of opportunity and to reduce health inequalities. Nothing in this guideline should be interpreted in a way that would be inconsistent with compliance with those duties.

NICE guidelines cover health and care in England. Decisions on how they apply in other UK countries are made by ministers in the [Welsh Government](#), [Scottish Government](#), and [Northern Ireland Executive](#). All NICE guidance is subject to regular review and may be updated or withdrawn.

Economic study selection

Economic evidence study selection is shown in Figure 1. The number of included and excluded studies for each review question is detailed in Table 1.

Figure 1: Economic study selection for neonatal parenteral nutrition

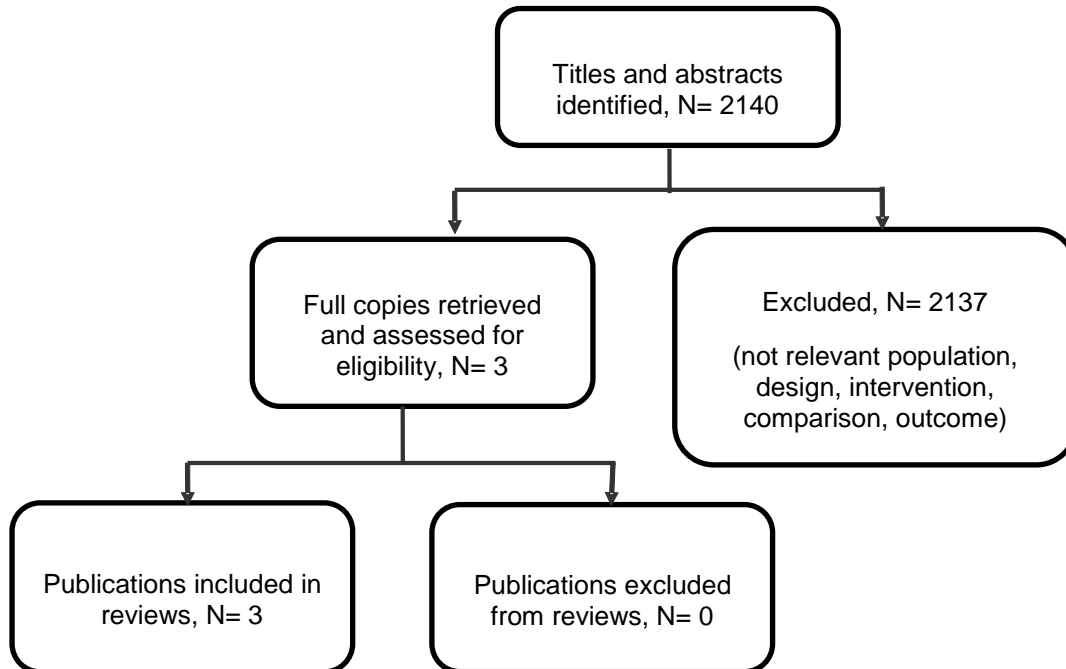

Table 1: Summary of economic study selection

	Chapter	Review questions	Number of included studies	Number of excluded studies
1.1	A	What are the predictors for enteral feeding success?	0	0
1.2	B	For those neonates where parenteral nutrition is required, what is the optimal timeframe for doing this?	0	0
1.3	C1	What are the most effective relative amounts of nitrogen and non-nitrogen energy (starting and target dose)?	0	0
1.4	C2	What are the most effective relative amounts of carbohydrates and lipids (starting and target dose)?	0	0
2.1	D	How many kcal/kg/day should be given to preterm and term babies receiving parenteral nutrition?	0	0
3.1	E1	What is the optimal target dosage for amino acids in preterm and term babies who are receiving parenteral nutrition and neonatal care?	0	0
3.2	E2	What is the optimal way (starting dose and approach to increment, if employed) to achieve this target dosage for amino acids?	0	0
3.3	F1	What is the optimal target dosage for carbohydrates in preterm and term babies who are receiving parenteral nutrition and neonatal care?	0	0
3.4	F2	What is the optimal way (starting dose and approach to increment, if employed) to achieve this target dosage for carbohydrates?	0	0
3.5	G1	What is the optimal target dosage for lipids in preterm and term babies who are receiving parenteral nutrition and neonatal care?	0	0
3.6	G2	What is the optimal way (starting dose and approach to increment, if employed) to achieve this target dosage for lipids?	0	0
3.7	H	What is the clinical effectiveness, efficacy, and safety of lipid formulations from different sources (for example, soya, fish oil, or mixed sources)?	0	0
3.8	I1	What are the optimal target dosages for calcium and phosphate in preterm and term babies who are receiving parenteral nutrition and neonatal care?	0	0
3.9	I2	What is the optimal ratio of phosphate to amino acid in preterm and term babies who are receiving parenteral nutrition and neonatal care?	0	0

	Chapter	Review questions	Number of included studies	Number of excluded studies
3.10	J	What is the most effective and safe iron supplementation compared to no iron or different dosage/formulations in preterm and term babies who are receiving parenteral nutrition and neonatal care?	0	0
3.11	K	How much (if any) intravenous acetate should be provided to preterm and term babies who are receiving parenteral nutrition and neonatal care?	0	0
3.12	L	What is the effectiveness, efficacy and safety of standardised parenteral nutrition bags compared with individualised bags?	3	0
4.1	M	What overall osmolality, concentration of calcium and glucose/dextrose in parenteral nutrition can determine whether to administer centrally or peripherally?	0	0
5.1	N	In babies on parenteral nutrition, what is the optimal frequency of blood sampling for monitoring glucose, calcium, phosphate, potassium and serum triglycerides?	0	0
6.2	O	What amount of enteral feed (measured in terms of ml/kg/d, or kcal/kg/d, or ratios in relation to PN and enteral feeds) indicates that parenteral nutrition is no longer required?	0	0
7.1	P	Are nutrition care/support teams effective in providing parenteral nutrition in preterm and term babies?	0	0
8.1	Q	What are the most effective methods of information provision about PN, and what information and support about this do parents/carers perceive as useful?	0	0
9.1	R	What are the general principles of neonatal parenteral nutrition?	0	0
