

Dyclonine

Revised: November 16, 2020.

CASRN: 586-60-7

Drug Levels and Effects

Summary of Use during Lactation

No information is available on the use of dyclonine during breastfeeding. Topical dyclonine products should be wiped off thoroughly prior to nursing if they are applied to the breast or nipple area. Topical dyclonine is relatively safe, but allergic contact dermatitis has been reported following dyclonine use, so it is best kept away from the infant's skin.
