

Appendix Table 10. Adjusted Vanderbilt Parent Rating Scale Scores, Intervention by PFCC Engagement Score<sup>a,b,c,d,e</sup>

Covariate	B-Coefficient	95% CI	P-Value
Intervention	-10.769	-26.814, 5.276	0.160
PFCC Engagement Score	-4.308	-7.036, -1.580	0.007
Intervention X PFCC Engagement Score	2.478	-1.661	6.617
Season			
Winter	-0.637	-4.628, 3.353	0.722
Spring	-1.068	-7.286, 5.150	0.702
Summer	0.236	-5.265, 4.738	0.923

<sup>a</sup> Participants were children aged 5-12 years old with ADHD who were recruited from 11 primary care pediatric practices. Engagement measure was completed at Study Visit 4. After imputation, there were 259 individual person-timepoints

<sup>b</sup> VPRS refers to Vanderbilt Parent Rating Scale

<sup>c</sup> Random effects models regressed VPRS scores on intervention status by PFCC engagement score and season and clustered by doctor's office

<sup>d</sup> The reference group for Season was Fall

<sup>e</sup> PFCC refers to Patient- and Family-Centered ADHD Care
