

Appendix Table 9. Adjusted Vanderbilt Parent Rating Scale Scores, Intervention by Access Engagement Score^{a,b,c,d}

Covariate	B-Coefficient	95% CI	P-Value
Intervention	-15.800	-32.446, 0.847	0.060
Access Engagement Score	-6.032	-9.656, -3.408	0.001
Intervention X Access Engagement Score	4.046	-0.410, 8.502	0.070
Season			
Winter	-0.473	-4.382, 3.436	0.787
Spring	-2.236	-8.183, 3.712	0.411
Summer	0.148	-4.689, 4.984	0.946

^a Participants were children aged 5-12 years old with ADHD who were recruited from 11 primary care pediatric practices. Engagement measure was completed at Study Visit 4. After imputation, there were 251 individual person-timepoints

^b VPRS refers to Vanderbilt Parent Rating Scale

^c Random effects models regressed VPRS scores on intervention status by access engagement score and season and clustered by doctor's office

^d The reference group for Season was Fall
