Appendix D. Qualitative Code Tree

Appendix D. Qualitative Code Tree

INTERVIEW DOMAIN	LEVEL 1 CODE	LEVEL 2 CODES	LEVEL 3 CODES
0	Interviewee Profile	Role/Job Title	
Interviewee's role		Years at CHA	
1a	Eliciting barriers to	Asking directly	
Obtaining information on	treatment from patients		
barriers to treatment		Challenges to	
		elicit barriers	
		Component of	
		formal care plan	
		During shared	
		decision process	
		Long-term relation with	
		patient	
		Other sources	Collecting info on SDH,
		other sources	Insurance coverage,
			Non-verbal
			communication
		Patient volunteers	
	Social Determinants of		
42	Health data		
1b	Eliciting preferences from	Asking directly	
Obtaining information on patient preferences for	patients		
treatment		Challenges to	Lack of trust in
		elicit preferences	provider, Patient educational level
		Component of	ratient educational level
		formal care plan	
		During shared	
		decision process	
		Indirectly	
		Long-term	
		relation with	
		patient	
		Other sources	Collecting info on SDH,
			Insurance coverage,
			Non-verbal communication
		Patient volunteers	Concerns related to
		1 attent volunteers	treatment/condition,
			Preferences
		Provider offers	
		choices/options	
	Eliciting narratives of past	Advantages,	
Patient experiences of discrimination/unfair	discrimination/unfair	Disadvantages,	
discrimination/unfair treatment	treatment	No, Triggers leading	
d'Catinent		to conversation,	
		Yes	
		1 68	

	Views about discrimination	CHA =	
	in health care settings	elsewhere,	
		CHA <elsewhere,< th=""><th></th></elsewhere,<>	
		CHA >	
		elsewhere,	
		Happens often	
		generally,	
		Rarely happens	
3	Views about patient	Lifestyle	
Influence of past	preferences in relation to	changes,	
discrimination on treatment	past experiences of	Medication,	
preferences	discrimination	Talk	
4	Usefulness of barriers data	Advantages,	
Eliciting data (preferences,		Disadvantages	
barriers, past	Usefulness of discrimination	Advantages	Responsiveness to
discrimination)	data		patient needs
to improve treatment plans		Disadvantages	Inability to respond to
		Disactantages	patient needs
		Relative	patient needs
		importance	
	Usefulness of preferences	Advantages,	
	data	Disadvantages	
5	Survey implementation	Challenges	Confidentiality
How to improve elicitation			Concerns,
of preferences,			How to use data,
discrimination, barriers at			Impairment due to
CHA			mental illness,
			Implementation
			logistics,
			Individual-level
			approaches,
			Literacy issues,
			Patient burden,
			Staff burden,
			System-wide approaches
6	Reaction to DCE	Negative,	
Specific Use of Discrete		Positive	
Choice Experiment	Reaction to output from	Negative,	
_	DCE	Positive
